SUMMARY

MCA student at CHARUSAT with hands-on experience in full-stack web development using Django, Angular, and SQL databases. Developed EduTrack, a role-based learning management platform featuring authentication, REST APIs, assignment tracking, and student progress monitoring. Strong foundation in software development, database design, and problem solving.

EDUCATION

Master of Computer Application — CMPICA, CHARUSAT, Anand
Bachelor of Computer Application — SEMCOM, CVMU, Anand
12th Higher Secondary — Shree Sahjanand High School, Botad

Jul 2025 – Present | Current CGPA: 7.7 CGPA

Jul 2022 – Apr 2025 | 9.68 CGPA

Jun 2021 – Mar 2022 | 97.55 %

SKILLS

Languages: Python, JavaScript, Java, PHP, C/C++,

Frontend: AngularJS, HTML5, CSS3, Bootstrap

Backend: Django, Django REST Framework, REST APIs, JWT Authentication, Role-Based Access Control (RBAC)

Databases: MySQL, MongoDB, MS SQL Server, SQLite3

Tools: Git/GitHub, Postman, Visual Studio, WAMP

Additional Exposure : Node.js, Express.js

PROJECTS

EduTrack — Student Assignment & Learning Management Portal [Code](#)

2025

Python | Django REST Framework | AngularJS | SQLite3 | JWT Authentication | GitHub

- Developed a role-based Learning Management System (LMS) where instructors can create courses, add modules, upload study materials, create assignments, and monitor student performance.
- Built REST APIs using Django REST Framework for authentication, course management, assignment handling, file uploads, grading, and student progress tracking.
- Designed a normalized SQLite database with relationships between students, instructors, courses, assignments, submissions, and feedback using foreign key constraints.
- Implemented JWT-based authentication and role-based access control to provide separate dashboards and permissions for students and instructors.
- Developed features such as assignment submission, file upload/download, grading, instructor feedback, announcements, deadline tracking, and analytics dashboards.
- Integrated AngularJS frontend with Django backend APIs and managed the complete development lifecycle including database design, API development, frontend integration, testing, and version control using GitHub

E-Commerce Platform — Home Decor Store [Live Link](#)

2023

WordPress | WooCommerce | Custom CSS/HTML | UI/UX Design

- Deployed on **cloud infrastructure**, managing complete lifecycle from local setup to live production with performance optimization and uptime monitoring.
- Engineered **mobile-optimized UI components** — 'Watch & Shop' video reel and dynamic testimonial gallery using CSS flexbox and scroll-snapping.

Production Management System [Code](#)

2024

PHP | MySQL | HTML | CSS

- Designed **dynamic dashboards** to visualize production metrics (yearly/monthly/weekly) with secure CRUD operations ensuring full data integrity.
- Applied structured data querying and reporting logic to generate meaningful business insights.

ACHIEVEMENTS

- Scroll of Honor — SEMCOM** — Awarded for outstanding academic performance & extracurricular contributions.
- CODEMANTHAN 1.0 Hackathon** — Developed an innovative solution under competition constraints. [Certificate](#)
- Academic Excellence** — 9.68 CGPA in BCA and 97.55 percentile in 12th board exams.

CERTIFICATIONS

- Django Application Development with SQL and Database — IBM (Coursera) [View Certificate](#)
- Python Data Structures: Lists, Strings & Files — University of Michigan (Coursera) [View Certificate](#)
- Python Basics: Selection and Iteration — University of Michigan (Coursera) [View Certificate](#)
